| <b>Brief summary</b> .....  | 3  |
| <b>Acknowledgements</b> .....   | 5  |
| <b>1 Longitudinal and transverse quantization of the "vacuum".</b>  |    |
| <b>Fundamentals of the Algebra of Signatures</b> .....  | 6  |
| 1.1 Technical post-Newtonian vacuum.....  | 6  |
| 1.2 Longitudinal layering of flat "vacuum" at $\lambda_{m,n}$ -vacuum .....                                       | 7  |
| 1.3 Lidar method of investigation of the "vacuum".....  | 8  |
| 1.4 Features of the lidar method .....  | 10 |
| 1.5 Geodetic line in a $\lambda_{m,n}$ -vacuum .....  | 11 |
| 1.6 Sixteen rotating 4-bases .....  | 12 |
| 1.7 Subcont and antisubcont .....   | 15 |
| 1.8 Algebra of stignatures .....  | 18 |
| 1.9 Stignature-spectral analysis .....  | 24 |
| 1.10 The Algebra of Signatures .....  | 28 |
| 1.11 The first step of compactification of additional measurements .....  | 32 |
| 1.12 The second step of the compactification of extra dimensions.<br>"Vacuum balance" and "vacuum condition"..... | 35 |
| 1.13 Dual $\lambda_{m,n}$ -vacuum regions.....  | 38 |
| 1.14 Metrics with respect to spin-tensors.....  | 40 |
| 1.15 Dirac "bundle" of the quadratic form .....   | 50 |
| 1.16 The explosion of mathematical (auxiliary) measurements .....   | 55 |
| 1.17 Light-geometry on a curved area of a "vacuum".....   | 57 |
| 1.18 Curved metric 4-space .....  | 59 |
| 1.19 4-tensor of deformations .....   | 60 |
| 1.20 The first step of compactification of curved measurements .....  | 61 |
| 1.21 The second step in compactification curved measurements .....  | 63 |
| 1.22 The tensor 4-tension of a $2^3$ - $\lambda_{m,n}$ -vacuum region .....                                       | 64 |
| 1.23 The physical interpretation of non-zero components of the metric tensor.....                                 | 69 |
| 1.24 The physical interpretation of zero components of the metric tensor .....                                    | 70 |
| 1.25 Maximum velocity of $\lambda_{m,n}$ -vacuum layers .....   | 74 |
| 1.26 Inert layer properties of a $\lambda_{m,n}$ -vacuum .....  | 75 |
| 1.27 Kinematics gap of a local region of the "vacuum".....  | 78 |
| 1.28 Conclusion on Chapter 1.....   | 81 |

|   |     |
|---|-----|
| <b>2 Extensions of the Einstein field equations and their solutions</b> .....   | 83  |
| 2.1 The first Einstein field equation and its solutions.....  | 83  |
| 2.2 The second vacuum Einstein field equations and their solutions .....  | 92  |
| 2.3 The non-Riemannian geometry with torsion and rotation .....   | 96  |
| 2.4 Advanced (third) Einstein field equation .....  | 98  |
| 2.5 Solutions of the third Einstein field equations .....   | 99  |
| 2.6 Hierarchy of ten spheres .....  | 101 |
| 2.7 Lucas-Fibonacci branches .....  | 111 |
| 2.8 The elements of the Algebra of signatures .....   | 112 |
| 2.9 The «proton» and «antiproton».....  | 118 |
| 2.10 The «neutron».....   | 124 |
| 2.11 The hydrogen «atom».....   | 126 |
| 2.12 «Fermions» in the Algebra of Signatures.....   | 127 |
| 2.13 «Bosons» in the Algebra of Signatures.....   | 130 |
| 2.13.1 The «photon» and «antiphoton».....   | 133 |
| 2.13.2 The $W^\pm$ -«bosons».....   | 133 |
| 2.13.3 The $Z^0$ -«bosons».....   | 134 |
| 2.13.4 The «graviton».....  | 136 |
| 2.14 Conclusion on Chapter 2.....   | 137 |
| <b>3 Derivation of Schrödinger's equation</b> .....   | 140 |
| 3.1 A brief history of the emergence of Schrödinger's equation.....   | 140 |
| 3.2 <i>Model of particle in motion</i> .....  | 142 |
| 3.3 Determination of the probability density function of the $n$ -th derivative<br>of an $n$ -times differentiable stationary stochastic process..... | 145 |
| 3.4 The coordinate representation of the average particle momentum .....  | 155 |
| 3.5. Derivation of Schrödinger's equation .....   | 158 |
| <b>4 Excited states of spherical vacuum formation cores.</b>  |     |
| <b>Basics of Stochastic (quantum) metaphysics</b> .....   | 164 |
| 4.1 Summary of the fourth chapter .....   | 164 |
| 4.2 States of internal “particelle” inside the core of a vacuum formation.....  | 164 |
| 4.3 Internal “particelle” in a potential well .....   | 168 |
| 4.4 Internal particelle in elastically strained vacuum environment .....  | 169 |
| 4.5 Angular quantum characteristics of a wandering “particelle”.....  | 172 |
| 4.6 «Muons», $\tau$ -«leptons» and $c, s, t, b$ -«quarks».....  | 179 |
| 4.7 Conclusions on Chapter .....  | 180 |

|  |     |
|--|-----|
| <b>5 The overall dynamics of vacuum layers and «vacuum electrostatics»</b> .....   | 184 |
| 5.1 Stratification of «vacuum».....  | 184 |
| 5.2 The equation of the geodesic line in a two-sided $2^3-\lambda_{m,n}$ -vacuum region.....                                       | 185 |
| 5.3 Eight-sided consideration.....   | 188 |
| 5.4 Hidden dynamics of the transverse vacuum layer .....   | 193 |
| 5.5 Overall dynamics of the metric space with constant curvature .....   | 197 |
| 5.6 The vectors of the field strength and induction of the vacuum layer .....  | 200 |
| 5.7 The vectors of tension and induction of a $2^k-\lambda_{m,n}$ -vacuum region .....   | 203 |
| 5.8 Metric-dynamic models of the «electron» and the «positron».....  | 204 |
| 5.9 The outer shell of the «electron» and «positron».....  | 209 |
| 5.10 Vacuum electrostatics of «electron» and «positron».....   | 210 |
| 5.11 The core of the «electron» and «positron» at rest .....   | 221 |
| 5.12 Isospin of the cores of the «electron» and «positron» at rest .....   | 231 |
| 5.13 Probabilistic description .....   | 242 |
| 5.14 The rotation core of the «electron» and «positron».....   | 247 |
| 5.15 <i>Rakya</i> (abyss) around the cores of «electrons» and «positrons».....   | 257 |
| 5.16 Summary of Chapter 5.....   | 272 |
| <b>6 «Electron» motion. «Vacuum electrodynamics»</b> .....   | 274 |
| 6.1 Introduction .....   | 274 |
| 6.2 Outer shell of resting «electron» or «positron».....   | 274 |
| 6.3 Outer shell of a moving «electron» or «positron».....  | 277 |
| 6.4 The shape of the cores of a moving «electron» or «positron».....   | 278 |
| 6.5 The scope of the a moving «electron» and «positron».....   | 281 |
| 6.6 The scope of the a moving «electron» and «positron».....   | 282 |
| 6.7 Simplified metric-dynamic model of the moving «electron»<br>and the moving «positron».....                                     | 283 |
| 6.8 Accelerated movement of the vacuum layer.....  | 286 |
| 6.9 Accelerated currents of <i>a</i> -subcont in the outer shell of a moving «electron».<br>Basics of vacuum electrodynamics ..... | 287 |
| 6.10 Accelerated currents of the <i>b</i> -subcont in the outer shell of a moving «electron».....                                  | 293 |
| 6.11 Accelerated vacuum currents in the outer shell of a moving “electron”.<br>Vacuum electrodynamics .....                        | 296 |
| 6.12 Precession of the axis of rotation of the core of a moving «electron».....  | 299 |
| 6.13 Straight-line and uniform movement of a «positron».....   | 301 |
| 6.14 $2^3-\lambda_{-11,-16}$ - vacuum dynamics .....   | 303 |

|   |     |
|---|-----|
| <b>7 Metric-dynamic models of different varieties of «neutrinos»<br/>in the framework of the axiomatics of the Algebra of signatures</b> .....    | 305 |
| 7.1 Toroidal - helical vortex in the outer shell of a moving «electron».....  | 305 |
| 7.2 The single $a \times b$ -subcont toroidal-helical vortex.....   | 308 |
| 7.3 Deformations at the location of a stable electron «neutrino».....   | 310 |
| 7.4 The possibility of formation of electron «neutrinos».....   | 315 |
| 7.5 Possibility generating of an aquatic «neutrino». Volkov impact effect.....  | 319 |
| 7.6 Excited States of «neutrinos».....  | 325 |
| 7.7 Protonic «neutrino».....  | 326 |
| 7.8 "Kelyphosons" and "rozosons".....   | 336 |
| 7.9 Conclusion to Chapter 7.....  | 338 |
| <b>8 Vacuum electrostatics in the framework of the Algebra of signatures.<br/>Interaction of stationary «particles» and «antiparticles»</b> ..... | 340 |
| 8.1 Simplified models stationary «electron» and motionless «positron».....  | 340 |
| 8.2. Interaction of «particles» and «antiparticles».....  | 343 |
| 8.3 Static «electron» - «positron» interaction .....  | 344 |
| 8.4 Static «electron» - «electron» interaction .....  | 349 |
| 8.5 Chapter 8 conclusions .....   | 352 |
| <b>9 Gravity in the framework of the axiomatics of the Algebra of Signatures.<br/>Interaction of uncharged «particles»</b> .....                  | 354 |
| 9.1 Brief analysis of ideas about the nature of gravity .....   | 354 |
| 9.2 Naked «star» and naked «planet».....  | 358 |
| 9.3 Simplified metric-dynamic model of a naked «star».....  | 362 |
| 9.4 Simplified metric-dynamic model of the naked «planet».....  | 367 |
| 9.5 The average of the metric-dynamic model of the external envelope<br>naked «stars» and naked «planet».....                                     | 369 |
| 9.6 Subcont-antisubcont currents in the vicinity of the naked core «stars»<br>and core bare lands «planet».....                                   | 370 |
| 9.7 The interaction between naked «stars» and naked «planet».....   | 377 |
| 9.8 The interaction of outer space objects without any core .....   | 381 |
| 9.9 Summary on Chapter 9.....   | 382 |
| <b>10 Conclusion</b> .....  | 384 |
| <b>Definitions of the stochastic metaphysics</b> .....  | 385 |
| <b>References</b> .....   | 392 |
| <b>Content</b> .....  | 497 |
